

## **Operating Room Solutions & Biogel Gloves** Product Catalogue

# We are Mölnlycke, a world-leading medical solutions company

We're here to advance performance in healthcare across the world, and we aspire to equip everybody in healthcare with solutions to achieve the best outcomes.

We collaborate with customers to understand their needs. We design and supply medical solutions to enhance performance at every point of care – from the operating theatre to the home.

## **Improving performance at every point of care**

This is what motivates us every day. We focus on the details that make our solutions more effective. All so that healthcare professionals can perform at their best, and achieve the best clinical and health-economic outcomes.

We do it by....

### **Listening**

We collaborate with healthcare professionals and patients to understand their needs. Then we design solutions that meet them.

### **Generating evidence**

Using a scientific approach, we generate clinical and health-economics evidence proving that our solutions are cost effective, and that they support better outcomes.

### **Continuously improving**

We're always on the lookout for new ways to improve. We focus on the details that make our solutions more effective, improve outcomes and offer better value for money.

### **Educating**

We're always learning. And we share our knowledge through in-person training, videos, demonstrations and online and offline seminars.

We collaborate with specialists to shape healthcare policies and protocols.

### **Building relationships**

We develop long-term trusted relationships and partnerships with healthcare professionals, healthcare organisations and industry bodies.

We understand how important trust is, and we do everything we can to build and maintain it.

# Mölnlycke® ProcedurePak®

Truly customised solutions

## One solution with advantages for the whole team

Our customers tell us that our customised ProcedurePak solutions provide many benefits.

One size does not fit all. Every procedure is different and each hospital has its preferred configuration - and we can customise every pack to match.

- **Time savings:** Less preparation time
- Reduced risk of infection with fewer packages to open
- Reduced packaging leading to **less waste**
- Specialised components for orthopaedic and laparoscopy packs
- Over 5000 unique components to choose from
- A wide range of BARRIER general and speciality drapes and gowns able to add into any ProcedurePak
- A range of **sustainable drapes** and components that will help you achieve your sustainability goals
- Minimising risks to patients and offering high-quality care by ensuring accuracy and consistency for every procedure set-up
- **Simplify** the O.R. team's work
- Help reduce product spending and logistics costs
- Reduce administrative time from ordering to invoicing
- Leaner and more transparent processes, allowing all professional groups to focus on their key tasks

# Mölnlycke ProcedurePak

## Everything your team needs

We have everything your team needs for fully customised procedure packs for all specialities. Our experienced team of account managers and clinical specialists will support you with the selection of the highest quality components that are clinically acceptable and best meet your needs. The result? Everything you need in a single, convenient and cost-effective package.

## A customised solution for increased efficiency

Up to 40 % of preparation time saved<sup>1</sup>, enabling more procedures to be performed. In one package you will be able to:

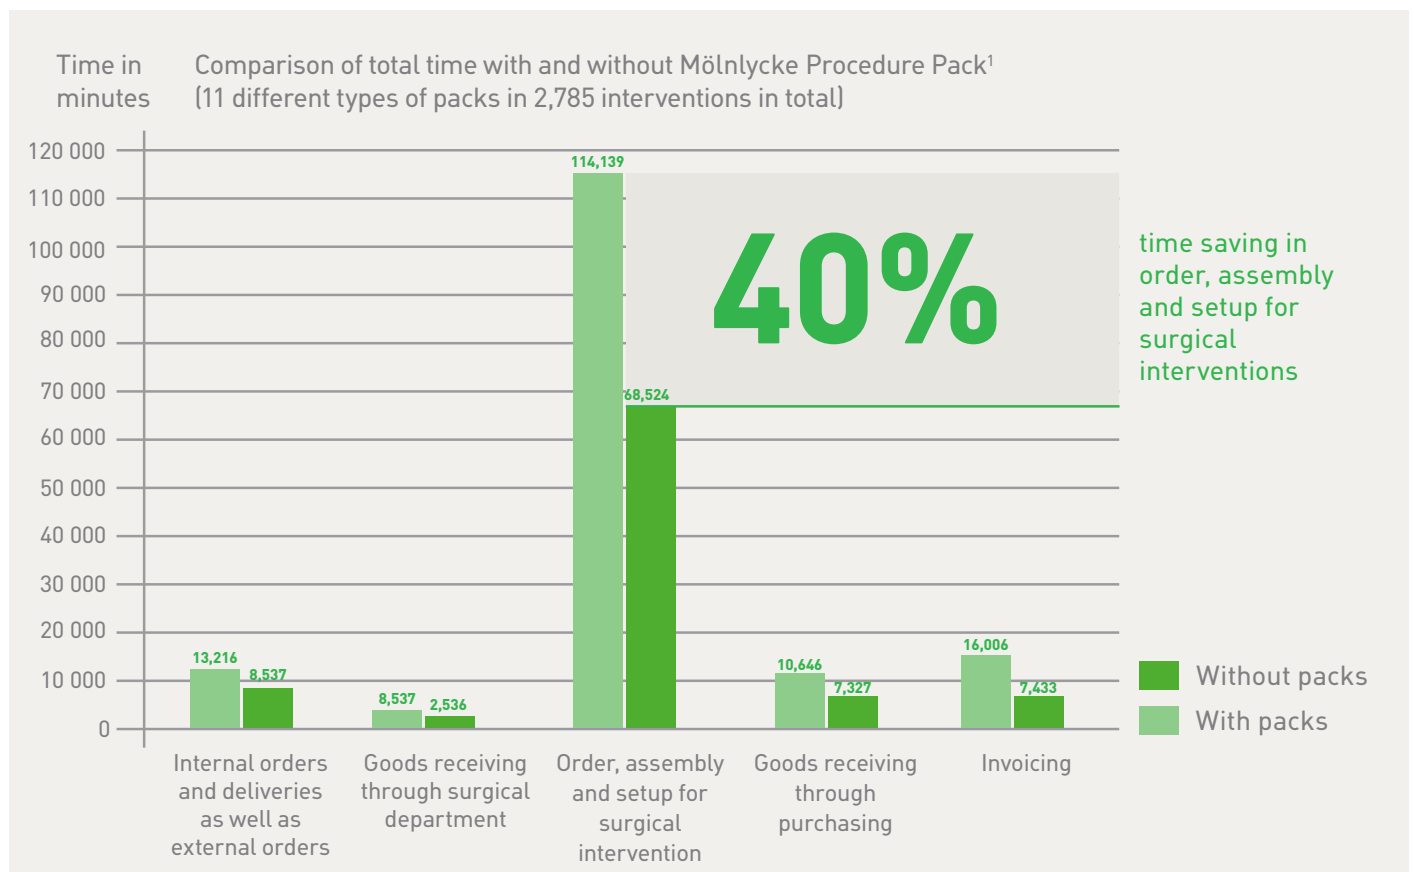

**Reduce preparation time by up to 40%<sup>1</sup>**

**Have confidence in each and every set up**

**Facilitate more procedures**

**Help reduce product spending**

1. Greiling M. A multinational case study to evaluate and quantify time-saving by using custom procedure trays for operating room efficiency. Poster presentation at the 23rd Congress of EAHA, Zürich, Switzerland, 9-10 Sep 2010. 2. HQSU0339 Customer testimonial, Herz-Jesu Hospital, Münster-Hiltrup, Germany. Data on file. 3. Shayler, M. Assessing the carbon and waste benefits of moving to procedure packs at Royal Liverpool and Broadgreen University Hospitals NHS Trust (2011)

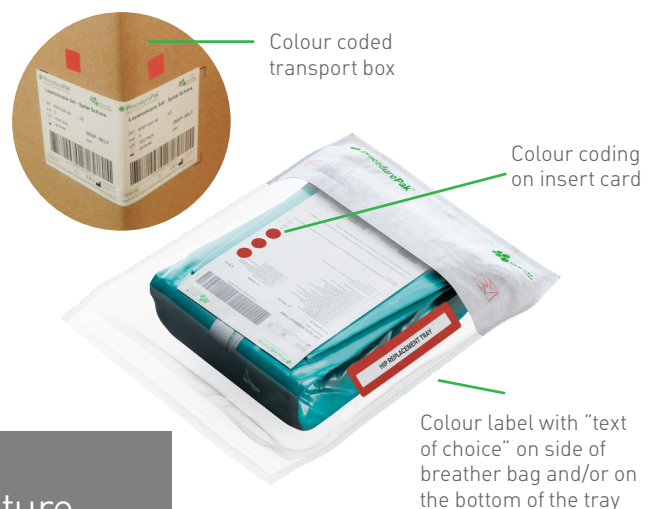

# Mölnlycke ProcedurePak

Colour code your packs and storage area to become even more efficient

Choose one of the existing 12 colours and decide on a side label text for each of your packs. The transport boxes will also be colour coded.

You can choose between 12 colours:

Online customisation keeps you in the picture

The Mölnlycke Portal is an online management tool that gives you complete control, visibility and transparency of all of your packs across multiple sites.

Ask your Account Manager how the Mölnlycke Portal allows you to build, analyse, change, estimate and review pack purchases with customisable multi-user access.

State of the art manufacturing facilities

Our second manufacturing facility opened in Havirov, Czech Republic in 2017 to complement our existing factory Karvina, Czech Republic, making the combined pack manufacturing yearly capacity up to 10 million packs.

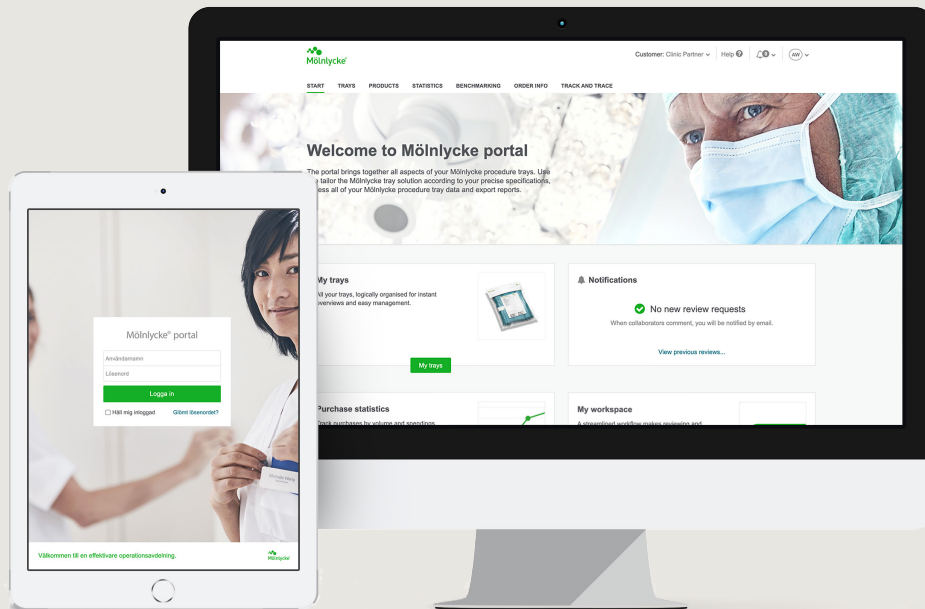

The facility, which hosts the largest Ethylene Oxide (EtO) sterilisation facility in Europe and provides a holistic perspective: from supply chain to production, sterilisation and distribution for the supply of Mölnlycke ProcedurePak.

# Introducing the Mölnlycke® Portal

## Maximising the value of your packs

**The Mölnlycke Portal gives you complete control over your customised ProcedurePak®.**

Allowing your organisation to save time, money and avoid waste with customised surgical procedure packs. Now you can increase the value gained by your ProcedurePak with **Mölnlycke's pack management portal**. Customer insights guided every step of the development, building a portal that overcomes challenges by giving:

### ✓ Control

The Mölnlycke Portal puts you in control of your team's procedure packs. You can manage spending on components and optimise value thanks to detailed statistics

### ✓ Transparency

The Mölnlycke Portal lets relevant users throughout the organisation manage the use of packs by viewing all packs and components of each customised pack

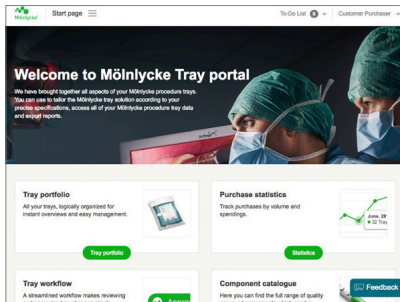

### ✓ Efficiency

The Mölnlycke Portal is easy to use with simple and logical steps and commands. The portal gives you the possibility to share pack information quickly and easily and to approve pack changes in a transparent and effective way

# The Mölnlycke Portal

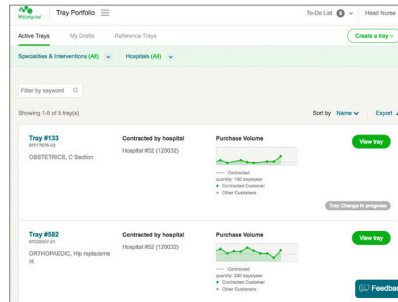

## A solution that makes a difference

Simply put, the **Mölnlycke Portal** helps you get the best from your ProcedurePak by making it easy to assemble the most efficient packs with the right components, all from one place. Improve control over your packs and maximise their value.

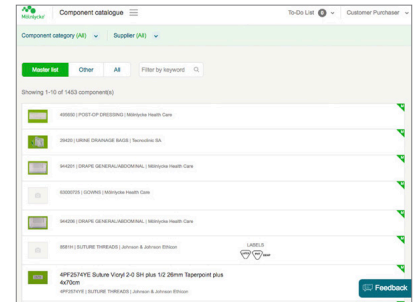

### Start page

Here you see a summary of the content in the portal.

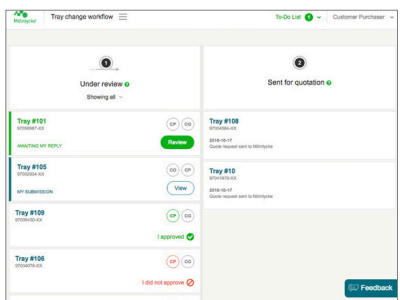

### Tray portfolio

Your pack overview with filters such as hospitals, indications and specialties.

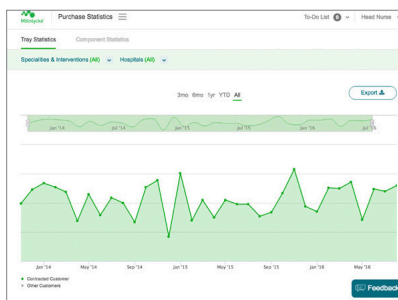

### Component catalogue

An overview of all the products that are possible to include in a pack.

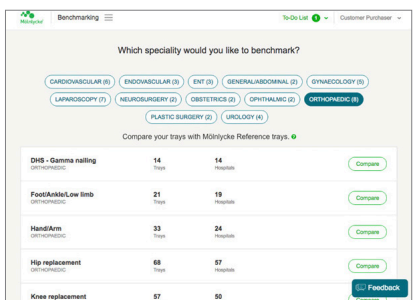

### Tray change workflow

Smooth easy pack changes with sharing of information within the portal and function to edit.

### Purchase statistics

Packs and component statistics that can be exported to Excel.

### Benchmarking

Suggestions for improvements and further efficiency gains in current packs.

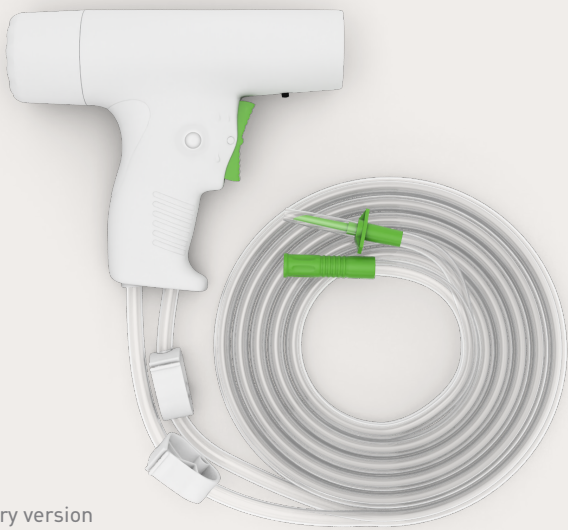

## The Mölnlycke Portal - A digital tool to:

- Tailor your packs to your precise specifications
- Get suggestion on how to optimise your packs for a specific procedure (i.e. cholecystectomy) to gain efficiency, including tips to shorten changeover times between procedures and reduce waste.
- Access all your ProcedurePak data
- See all of your ProcedurePak logistics detail for greater control
- Export reports to Excel
- Edit your pack in collaboration with your account manager within the portal

# Mölnlycke® Pulsed Lavage

Truly customised orthopaedic solutions

Battery version

AC version

Mölnlycke Pulsed Lavage is DEHP free

Our single-use high pressure pulsed lavage system effectively cleans bone and removes debris during total joint procedures. This increases cement penetration into the cancellous bone for potentially stronger implant fixation and reduced revision rates. It is also an effective mechanical wound debridement system for cleaning wounds, removing dirt, necrotic tissue and debris.

## Available in two versions

- **AC adapter:** reduced environmental impact thanks to lack of alkaline batteries. Single-use handpiece and re-usable AC adapter
- **Built-in battery:** a flexible and mobile version with battery pack integrated into the handpiece, for quick and easy battery removal

## All included means no hidden costs

- Ergonomic and comfortable handpiece
- Short fan spray tip with double splash shield
- Long femoral canal washout tip
- Integrated suction and irrigation
- Cleaning rod for solving potential occlusion in the femoral tip

## Single packed or included in Mölnlycke Procedure Pak

- Include Pulsed Lavage in your customised procedure-specific pack for efficiency gains

\* Pulsed Lavage's legal manufacturer is Kaiser Technology co., Ltd. Mölnlycke Health Care is importer and distributor.

# Mölnlycke® plume evacuation pencil

Surgical staff are at risk every time surgical plume is created in the operating room. The solution is in your hands with the unique **Mölnlycke plume evacuation pencil**. A superior solution that ensures minimised plume exposure and clear visualisation of the operative site.

## Putting the protection of you and your patients first.

- A unique all in one light-weight, slim design with an **integrated telescopic function** providing an immediate, on demand, solution for both deep and shallow incisions.
- Mölnlycke plume evacuation pencil offers a sustainable solution, **DEHP and PVC free**, hand piece and cable.
- **Very high suction capacity** (85 l/min) minimising plume exposure and providing rapid visualisation of the operative site.
- Available both in your customised ProcedurePak as well as single packed.
- Convenient 4m cable.
- **Universal 22mm connector** to fit most plume evacuation machines.
- **360° rotating swivel** – Comfortable, ergonomic prevention of wrist fatigue.
- **Stainless steel, PTFE and insulated PTFE electrode options** – Your preference, to suit your individual surgical needs.

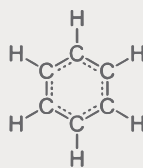

Surgical staff are at **risk** every time surgical plume is created in the operating room, for some this is **daily**.

## So what is contained within surgical plume?

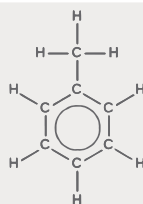

- Toxins (benzene, hydrogen cyanide, acetylene, formaldehyde, butadiene, acrylonitrile)
- Dead and viable cellular material, including cancerous tissue
- Bacteria and viruses, including HPV (human papilloma virus)

6

The plume generated from destroying or dissecting 1g of tissue contains the same level of harmful toxins as **smoking 6 unfiltered cigarettes**<sup>2</sup>.

Benzene

Toluene

More than  
**41**  
gases are present  
in plume

Healthcare professionals  
may be unwittingly  
exposed to the equivalent  
**of 20–30 cigarettes**  
per day

Prima Medical Limited is the legal manufacturer of the Plume Evacuation Pencil.

# Mölnlycke® surgical instruments

Mölnlycke is a world-leading surgical partner, designing, developing and manufacturing single-use surgical instruments that meet the diverse needs of healthcare professionals.

Our laparoscopic and orthopaedic specialists work closely with you to define and evaluate your best solution from our diverse surgical instrument range. The result? Your own truly customised laparoscopic solution in either single, sterile packaging, or incorporated into a truly customised procedure specific pack.

Your team strives for efficiency and patient outcomes. We understand why and have made your goals our focus. You can select an effective combination of Mölnlycke pulsed lavage, trocars, monopolar scissors, instruments, L-hook electrodes and detachable endoretrieval pouches, and

we pack all your needs into procedure packs that save time and costs.

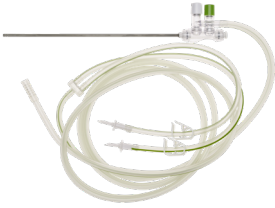

Our specialists can help you identify the solution that is exactly right for you and your team, helping you focus on the areas that you are most looking to improve. We can also work with you and your team to help drive the change process and give you even more value from your solution. **When we have found your truly customised solution, we can quantify the economic value, based on scientific studies and provide you with a full report.**

Our **5mm monopolar instruments** are available in **2 handle designs: Type I and Type II** and are available in a range of robust, wide-opening, dual-articulating jaw-tip configurations.

Handle Type I	Ref. No.	Description	Retailer QTY	Carton QTY
	899200	Straight Grasping Forceps 5mm/33cm	10	100
	899201	Maryland Dissecting Forceps 5mm/33cm	10	100
	899202	Clinch Grasping Forceps 5mm/33cm	10	100
	899204	Rat Tooth Grasping Forceps 5mm/33cm	10	100
	899206	Intestinal Grasping Forceps 5mm/33cm	10	100
	899207	Straight Grasping Forceps – fenestrated 5mm/33cm	10	100
Handle Type II	Ref. No.	Description	Retailer QTY	Carton QTY
	899208	Straight Grasping Forceps with ratchet control 5mm/33cm	10	100
	899209	Maryland Dissecting Forceps without ratchet after forceps 5mm/33cm	10	100
	899210	Clinch Grasping Forceps with ratchet control 5mm/33cm	10	100
	899212	Rat Tooth Grasping Forceps with ratchet control 5mm/33cm	10	100
	899214	Intestinal Grasping Forceps with ratchet control 5mm/33cm	10	100
	899215	Straight Grasping Forceps with ratchet control – fenestrated 5mm/33cm	10	100

## INSTRUMENTS / SUCTION AND IRRIGATION SET

Suction and Irrigation Set	Ref. No.	Description	Retailer QTY	Carton QTY
	899107	Suction & Irrigation Set dual spike 5mm/33cm	10	20
	899108	Suction & Irrigation Set dual spike 5mm/45cm	10	20
	899109	Suction & Irrigation Probe 10mm/33cm	10	100

- Ergonomic handpiece can be operated with either hand
- Clear handpiece for unobstructed view
- Soft and low torque DEHP free tubing with easy peel separation
- Comes in a 5mm/33cm and 5mm/45cm probe option
- 10mm/33cm probe available as a separate

## INSTRUMENTS / MONOPOLAR SCISSORS

Monopolar Scissors	Ref. No.	Description	Retailer QTY	Carton QTY
	899216	Monopolar Scissors – Metzenbaum 5mm/33cm	10	100
	899218	Monopolar Scissors – Metzenbaum 5mm/45cm	10	100

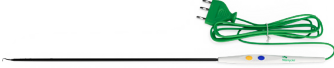

- For the precise controlled dissection, coagulation and transection of vessels and tissue
- Convenient, **always sharp**, single-use instrument eliminates reprocessing and sterilisation costs
- Sharp Metzenbaum jaw blades insure precise cutting action along the entire length of the blade

## INSTRUMENTS / MONOPOLAR L-HOOK ELECTRODE

Monopolar L-hook Electrode	Ref. No.	Description	Retailer QTY	Carton QTY
	899100	Monopolar L-hook Electrode 5mm/33cm	10	100
	899101	Monopolar L-hook Electrode with cable 5mm/33cm	10	400
Monopolar Instrument Cable universal	Ref. No.	Description	Retailer QTY	Carton QTY
	899110	Monopolar Instrument Cable universal 4mm	40	400
	899111	Monopolar Instrument Cable universal 8mm	40	400

- Lightweight, ergonomic handle design allows precise controlled tissue dissection and coagulation
- Insulated shaft provides effective monopolar current containment, preventing adjacent site tissue burn

## INSTRUMENTS / MONOPOLAR L-HOOK ELECTRODE

Monopolar L-hook electrode	Ref. No.	Description	Retailer QTY	Carton QTY
	420200	Monopolar L-hook electrode hand activated 5mm/33cm	10	100

- A PTFE coating on the active portion of the electrode reduces eschar adhesion, minimising surgical interruption and reducing thermal spread and resultant tissue necrosis
- Convenient, single-use instrument guarantees sterility and effective monoloar current containment preventing adjacent-site tissue burn
- Lightweight, ergonomic handle design allows precise controlled tissue dissection
- Hand-activation enables greater OR efficiency, improves operator comfort, and minimises the risk of musculoskeletal stress to theatre staff
- Built with sustainability in mind, the Mölnlycke L-Hook is PVC-free with a thermoplastic polyurethane (TPU) cable and inter-connectors

## INSTRUMENTS / DETACHABLE ENDORETRIEVAL POUCH

Detachable EndoRetrieval Pouch	Ref. No.	Description	Retailer QTY	Carton QTY
	899102	Detachable EndoRetrieval Pouch 9x 14.5cm (250ml) 10mm	5	50
	899103	Detachable EndoRetrieval Pouch 13x18cm (600ml) 10mm	5	50
	899112	Detachable EndoRetrieval Pouch 19x23cm (1150ml) 12mm	5	50
	899104	Detachable EndoRetrieval Pouch 19 x 23cm (1150ml) 15mm	5	50

- Self-opening cone pouch design allows quick and simple specimen capture
- Enhanced metal ring design ensures simple deployment and a large permanent pouch opening for capture of larger, more difficult specimens
- Fully detachable specimen bag allows greater convenience by allowing delayed specimen retrieval

# BARRIER® surgical drapes

All products and solutions within the BARRIER range of surgical drapes are developed and designed to facilitate the everyday work of the operating theatre.

Through the comprehensive range of procedure specific products, BARRIER can provide you with innovative product solutions designed to offer the optimal combination of protection and functionality. All BARRIER drapes are 100% impermeable and designed to ensure the best possible patient protection by providing an optimal barrier against microbial migration.

Effective infection control is achieved through impermeable materials, while effective fluid control is obtained through absorption or fluid collection pouches – allowing for a drier working area. Our attention to detail also ensures that all foldings are designed for optimal aseptic handling and easy application.

The BARRIER products also come complete with the best available service and support including both training for optimal usage and supply and logistic solutions all according to the customers' need.

BARRIER is well known in Australia and New Zealand and is Europe's leading brand in single-use surgical drapes. We are setting the standard with a range that fulfills the different needs in the operating theatre.

For Mölnlycke and the BARRIER range, our strong commitment is to the medical profession and to patients undergoing treatment.

# BARRIER® ISCC\* drapes

At Mölnlycke® Health Care, sustainability is more than just a word. It's about taking responsibility for our business impact and developing sustainably.

Our new range of ISCC certified surgical drapes marks the next big step in the long journey, towards actively minimising our environmental footprint.

With infection control at front of mind, our mission is to deliver a product that does not compromise on quality, form or functionality. Our ISCC drapes offers the identical performance of our non-ISCC equivalents, the difference is the use of biobased materials that reduce the depletion of fossil oil and reduces CO2 emissions.

Doing our part will require gradually reducing fossil-based CO2 emissions in our supply chain, in our production, optimising our resource use and maintaining full traceability.

For now, this is just one step in the many to come in our journey toward a more sustainable future.

\*International Sustainability & Carbon Certification. ISCC's mission is to protect forests, high-carbon stock lands and biodiversity, enable waste utilisation and increase traceability.

- 2-ply laminate material
- Impermeable all over material
- Low linting
- Nose bridges to facilitate breathing
- Fluid collection pouch 30cm x 18cm
- Full incise drape in aperture

## OPHTHALMIC DRAPES

	Ref. No.	Description	RET/CRTN*
 <p><b>NZ Only</b></p>	85617	Ophthalmic drapes 100×120cm 10×8cm aperture	24/48

## Features

- SMS material
- Impermeable in the critical area
- Low linting
- Breathable material
- Fluid collection pouch 30cm x 18cm
- Full incise in aperture

# BARRIER® staff clothing

Surgical gowns not only help prevent infection of the surgical wound, they also protect the operating team from liquid contamination.

BARRIER surgical gowns offer different levels of protection, covering the needs of less invasive operations with fluid repellent material to wet surgery with breathable plastic reinforced front, impermeable sleeves and seams. The toughest conditions can be met with a surgical gown that is impermeable all over.

BARRIER surgical gowns have very high comfort levels thanks to breathable and soft material.

Wearing apparel is developed to ensure both patient protection and comfort for healthcare professionals. The range of single-use scrub

suits and warm-up jackets provides the comfort and quality of wearing fresh clothes every day. Single-use scrub suits contribute to hospital infection control<sup>3</sup>.

BARRIER headwear provides high comfort and reduces the risk of particles falling into the wound<sup>4</sup>.

Medical masks are made from highest quality materials. They offer bacterial filtration and splash resistance<sup>5</sup>.

**References:** **3.** Neely AN, Maley MP. Journal of Clinical Microbial, 2000. 36;724-6. **4.** Jan Hoborn. Humans as dispersers of microorganisms - dispersion pattern and prevention. **5.** Fulfill the requirements of EN 14683:2005 Surgical masks - Requirements and test methods.

# Choose the right surgical gown for every procedure!

Surgical gowns are designed to protect patients and staff from cross-contamination. Mölnlycke® provides a wide BARRIER® assortment that will enable you to choose the right surgical gown for every procedure.

Materials that are breathable, soft and quiet helps staff to remain focused on the job at hand.

## Tailored for efficiency

The gown designs include ergonomic features that provide great freedom of movement, including:

Shoulder pleats

Forward facing sleeves

Long sleeves

Improved neck closure

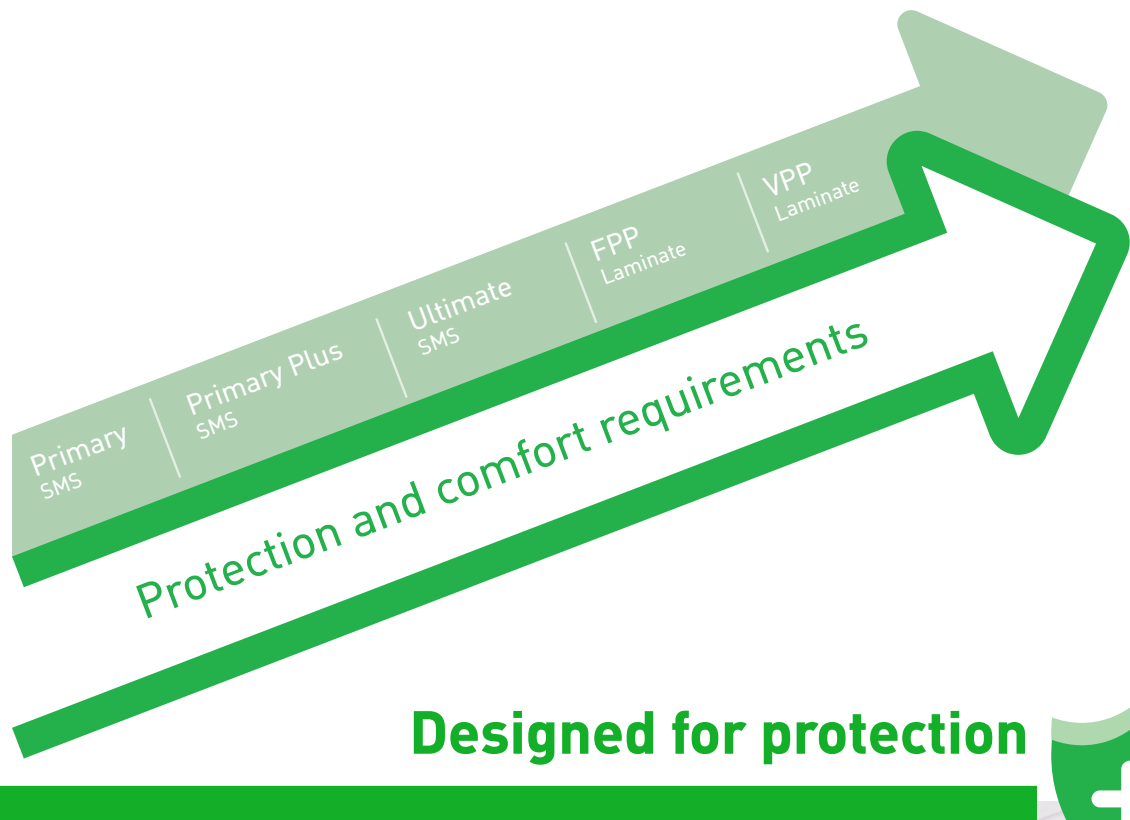

## Material features

### SMS

- Nonwoven polypropylene (spunbond for strength, meltblown for repellency)
- Breathable material
- Low linting

### Laminate

- Multiple-ply material, polyethylene film and polyester/polyethylene nonwoven
- Breathable material with microporous film that allow air and moisture to move from the body to the outside of the gown
- Polyethylene film prevents fluid strikethrough
- Comfort layer against the skin for increased comfort
- Low linting

Our range has been designed to provide the optimum combination of protection and comfort – from short, low-fluid procedures to long, complicated high-fluid procedures.

All BARRIER surgical gowns comply with EN 13795-1 standard or high performance and AAMI<sup>6,7</sup>.

The choice of gown depends on the procedure and specified requirements in local settings.

This table provides examples of expected use conditions and health care applications for which each level of barrier performance might be appropriate. The table may be used as an aid in the development of the health care facility's exposure control plan. The examples in the table are not intended to be all-inclusive, nor are they intended to substitute for professional judgement and experience. This table might not cover every situation encountered in the health care facility. Numerous factors can affect the selection of the appropriate barrier product. For example, variations in surgical technique and the duration of the procedure could increase the likelihood of liquid contact and the incidence of pressure applied and thus could influence the risk of exposure. In case in which the risk of exposure increases after the procedure is underway, a change to a higher level of protection should be made, if appropriate. In addition, clinical experience over time could well dictate the choice of levels of barrier performance for particular applications different from those suggested above. Because exposure risks are not equal and procedures could have multiple parts, the users should select the highest level of protection required by the scheduled procedure. Therefore, this table should be considered to provide general guidelines as a starting point for decision-making.

Risk is a function of fluid, quantity, time and exposure

# BARRIER® EasyWarm®

In the operating theatre, the effects of anaesthesia, coupled with a reduction in metabolic heat production, means patients are more at risk of hypothermia, which is defined as a core body temperature below 36°C. This can result in a wide range of consequences, from serious health risks through to increased costs. Hypothermia can occur before, during and after surgery.

The BARRIER® EasyWarm® active self-warming blanket helps to prevent hypothermia in the peri-operative setting. Once opened and unfolded, the blanket reaches operational temperature within 30 minutes and maintains a max temp of 44°C and can last up to 10 hours<sup>13-16</sup>.

The benefits of BARRIER EasyWarm are:

- Helps to prevent hypothermia in the peri-operative setting<sup>17</sup>.
- Easy and quick set up to save time.
- Easy to use before, during and after surgery for efficient patient warming<sup>17</sup>.
- Easily available to more patients thanks to no need for additional equipment.
- Available in two configurations, 1-piece as pictured or a 2-piece design to meet all positioning requirements. The 2-piece design allows for split upper and/or lower body coverage.

Every glove is made  
for protection. **Biogel**  
**is made for precision.**

**Biogel®**

Precision at every touch

A surgeon's knowledge and expertise reside in their brain, but their skill is delivered through their hands. By extension, a surgeon's hands are the most important instrument in the operating theatre; and the gloves they wear are an extension to this. Biogel® gloves are designed not only to protect the surgeon's hands but to support their precision<sup>1,2</sup>. This commitment to precision runs through everything we do: from how Biogel gloves are made, to how they feel and ultimately how they support the surgical team's precise performance.

# Precision where it counts

## 1. Precisely made<sup>3</sup>

- Biogel sets the benchmark for quality<sup>4</sup>
- Every pair goes through rigorous quality checks<sup>3,5</sup>
- Acceptable Quality Level (AQL\*) of 0.65 (freedom from holes), post packaging<sup>3</sup>

## 2. A feeling of precision

- Comfortable fit and high tactile sensitivity<sup>6,7,8,9</sup>
- Designed to remain comfortable for longer<sup>6,7,8,9</sup>

## 3. Supporting precise surgical performance

- A surgical device designed to support precision
- Best-in-class perforation detection<sup>10,11</sup>
- Lowest failure rate among major global competitors<sup>4</sup>

Competitor gloves are **3.5x** as likely to fail compared to Biogel gloves<sup>4</sup>

Up to **97%** of breaches spotted, with the clear, fast and large Puncture Indication<sup>10</sup>

**Excellent barrier protection**<sup>6,7,12,13</sup> reduces the risk of blood-borne viruses

**Low endotoxin level** (<20 EU/pair) which may reduce the risk of post-operative complication<sup>3,14</sup>

\*AQL=Acceptable Quality Level refers to the maximum number of defective products that could be considered acceptable during the random sampling of an inspection, in this case freedom from holes in gloves.

# Our commitment to precision

At Mölnlycke everything we do is about supporting the performance of our customers. This means supplying them with the most reliable – and most precise – equipment possible. This commitment begins with the design and engineering of Biogel gloves, and flows right through to the operating theatre.

## How they're made

Biogel gloves are made to such a high standard, we have a whole facility dedicated to quality control. You could say we're obsessive: every single pair of Biogel gloves undergoes rigorous quality checks including air-inflation testing, perforation assessments and multiple visual inspections along the development stages<sup>3,5</sup>.

The result is a glove that offers a post-packaging Acceptable Quality Level of 0.65<sup>3</sup> (freedom from holes) – meaning that our testing requirements are more stringent than industry standards, in order to avoid faulty products being shipped to customers.

## How they feel

There's a reason surgical teams around the world value Biogel gloves. Like any other glove they are designed to protect patients – and clinicians too. But the Biogel brand is built around a reputation for a comfortable fit and precise feeling, supporting precision at every touch<sup>6-9</sup>.

Biogel gloves are designed to remain comfortable for longer, providing extra support even in high pressure situations<sup>6-9</sup>. Even when double-gloved to reduce the risk of needlestick injury, dexterity and tactile sensation persist<sup>15</sup>. Precision in the OR is everything, choose a glove that takes it as seriously as you do.

## How they perform

For surgeons, who rely on their skilled hands and sense of touch, Biogel gloves are more than a protective barrier – they also support precise performance<sup>6-9</sup>. The same is true for the wider OR team, who can rely on Biogel's best-in-class perforation detection<sup>10,11</sup> to ensure breaches are spotted quickly, enabling them to focus on the task at hand.

In fact, Biogel gloves even support the performance of the procurement team; the lowest failure rate among major competitors<sup>4</sup> could lead to less waste and help avoid costly complications. You can have confidence you are investing in a glove that performs to the same high standards you expect of your surgical team.

Surgical teams around the world **value Biogel gloves for their comfortable fit and precise feeling**<sup>6-9</sup>

# A precise puncture indication system

We are double gloving pioneers: our patented Puncture Indication system was the world's first<sup>16</sup>. We will support you in finding the best underglove/overglove combination for your team – with a variety of both synthetic and natural rubber latex options. Whether you're seeking extra grip or enhanced sensitivity, we can provide you with a double gloving system aligned to your needs.

## Clear

The colour of the underglove has been designed to attract the human eye to any punctures. The overgloves are opaque, so when punctured they alert you by showing the colour of the underglove.

## Fast

The patented glove surface treatment highlights the puncture area by highlighting trapped fluid. The visible indication then grows quickly to alert the wearer.

## Large

The puncture spot will become larger to indicate damage to the glove. Colleagues should also be able to detect the puncture, even if it is outside the wearer's immediate line of sight.

**71%** proven reduction in sharps injuries, leading to lower exposure to bloodborne infections when double gloving<sup>17</sup>

**60** or more blood-borne pathogens can be transmitted to healthcare workers due to accidental exposures. HIV, Hep B and Hep C account for most of this risk<sup>19</sup>

**95%** of surgeons polled said they had experienced at least one needlestick injury in their career<sup>18</sup>

**1 in 10** glove punctures are noticed on average during surgery<sup>17</sup>, putting surgeon, OR staff and patients at risk

# Providing you with **precision support**

Our surgical sales specialists are here to help you implement your double-gloving policy or move from natural rubber latex to synthetics.

The process is designed to be seamless and worry-free. Together, we'll help you find the right material, features and sizes to suit your team's precise needs. The Biogel team will support you with evaluations and educational programmes and can also guide you on issues like infection prevention, recommended best practices and the proper use of surgical gloves.

We can even help you increase operating room efficiency and safety through education on correct glove-use, glove standardisation, and understanding synthetic alternatives.

## **Experience precision first hand**

The best way to appreciate the precise feeling of Biogel surgical gloves is to try them. Experience how easily they glide on, the comfortable fit and precise feeling. Get in touch and we'll make sure that you and your team can experience our surgical gloves right away.

# Choose a glove equal to the task your team performs

The gloves your team wear during surgery can have a significant impact on their performance. Don't take our word for it, take theirs – in a recent survey of 500+ surgeons **81% agreed that 'high-quality surgical gloves can positively impact overall patient outcomes'**<sup>18</sup>.

Whilst the value of investing in a better glove may be hard to capture on a spreadsheet, it can be measured in the confidence of the team wearing them. So when you're calculating how much to invest in gloves, be sure to ask your surgical team which brand fits best and supports their precision.

Biogel® PI Micro		485XX	
Ref. No.	Description	RET/CRTN*	
48555	Biogel PI Micro 5.5	50 / 200	
48560	Biogel PI Micro 6.0	50 / 200	
48565	Biogel PI Micro 6.5	50 / 200	
48570	Biogel PI Micro 7.0	50 / 200	
48575	Biogel PI Micro 7.5	50 / 200	
48580	Biogel PI Micro 8.0	50 / 200	
48585	Biogel PI Micro 8.5	50 / 200	
48590	Biogel PI Micro 9.0	40 / 160	

Recommended for all surgical procedures and when extra tactile sensitivity is needed or when latex allergies are a concern for patients or clinicians. Biogel® PI Micro is a synthetic, powder-free, polyisoprene, surgical glove that has the fit, feel and comfort of natural rubber latex. It's typically 20% thinner than Biogel® PI UltraTouch® and it is designed for improved tactile sensitivity.

Biogel® PI Micro Indicator System		483XX	
Ref. No.	Description	RET/CRTN*	
48355	Biogel PI Micro Indicator System 5.5	25x2/100x2	
48360	Biogel PI Micro Indicator System 6.0	25x2/100x2	
48365	Biogel PI Micro Indicator System 6.5	25x2/100x2	
48370	Biogel PI Micro Indicator System 7.0	25x2/100x2	
48375	Biogel PI Micro Indicator System 7.5	25x2/100x2	
48380	Biogel PI Micro Indicator System 8.0	25x2/100x2	
48385	Biogel PI Micro Indicator System 8.5	25x2/100x2	

Recommended for all surgical procedures and when extra tactile sensitivity is needed or when latex allergies are a concern for patients or clinicians. Double-packed, the sterile Biogel® PI Micro Indicator System consists of a blue, synthetic underglove combined with a skin coloured Biogel® PI Micro overglove that, when worn together, create a coloured puncture indication system.

Biogel® PI Indicator® Underglove		416XX	
Ref. No.	Description	RET/CRTN*	
41655	Biogel PI Indicator Underglove 5.5	50 / 200	
41660	Biogel PI Indicator Underglove 6.0	50 / 200	
41665	Biogel PI Indicator Underglove 6.5	50 / 200	
41670	Biogel PI Indicator Underglove 7.0	50 / 200	
41675	Biogel PI Indicator Underglove 7.5	50 / 200	
41680	Biogel PI Indicator Underglove 8.0	50 / 200	
41685	Biogel PI Indicator Underglove 8.5	50 / 200	
41690	Biogel PI Indicator Underglove 9.0	40 / 160	

Recommended for use in all general surgeries or surgeries where latex allergies are a concern for patients or clinicians. The gloves provide levels of fit, feel and comfort comparable to natural rubber latex because synthetic polyisoprene shares comparable molecular structure. The underglove is blue in colour and can be worn as part of the Biogel® Puncture Indication System. The smooth surface is specifically engineered for unparalleled ease of double-donning.

Biogel® PI OrthoPro		476XX	
Ref. No.	Description	RET/CRTN*	
47660	Biogel PI Orthopro 6.0	40/160	
47665	Biogel PI Orthopro 6.5	40/160	
47670	Biogel PI Orthopro 7.0	40/160	
47675	Biogel PI Orthopro 7.5	40/160	
47680	Biogel PI Orthopro 8.0	40/160	
47685	Biogel PI Orthopro 8.5	40/160	
47690	Biogel PI Orthopro 9.0	40/160	

Recommended for all orthopaedic surgical surgeries, where robust barrier protection is necessary or surgeries where latex allergies are a concern for the patients or clinicians.

Biogel® PI Micro Indicator Underglove		489XX	
Ref. No.	Description	RET/CRTN*	
48955	Biogel PI Micro Indicator Underglove 5.5	50 / 200	
48960	Biogel PI Micro Indicator Underglove 6.0	50 / 200	
48965	Biogel PI Micro Indicator Underglove 6.5	50 / 200	
48970	Biogel PI Micro Indicator Underglove 7.0	50 / 200	
48975	Biogel PI Micro Indicator Underglove 7.5	50 / 200	
48980	Biogel PI Micro Indicator Underglove 8.0	50 / 200	
48985	Biogel PI Micro Indicator Underglove 8.5	50 / 200	
48990	Biogel PI Micro Indicator Underglove 9.0	40 / 160	

Recommended to be used as an underglove for all surgical procedures or surgeries where latex allergies are a concern for patients or clinicians. The blue glove can be worn as part of the Biogel® Puncture Indication System together with any Biogel PI overglove particularly when improved tactile sensitivity is needed. Typically 20% thinner than Biogel® PI Indicator Underglove, the Biogel® PI Micro Indicator Underglove is designed for improved tactile sensitivity.

Biogel® PI UltraTouch®		409XX	
Ref. No.	Description	RET/CRTN*	
40955	Biogel PI UltraTouch 5.5	50 / 200	
40960	Biogel PI UltraTouch 6.0	50 / 200	
40965	Biogel PI UltraTouch 6.5	50 / 200	
40970	Biogel PI UltraTouch 7.0	50 / 200	
40975	Biogel PI UltraTouch 7.5	50 / 200	
40980	Biogel PI UltraTouch 8.0	50 / 200	
40985	Biogel PI UltraTouch 8.5	50 / 200	
40990	Biogel PI UltraTouch 9.0	40 / 160	

Recommended for all surgical procedures or surgeries where latex allergies are a concern for the patients or clinicians. It can be used alone or as part of a Biogel® Puncture Indication System with the Biogel PI Indicator® Underglove.

Biogel® PI Indicator System		414XX	
Ref. No.	Description	RET/CRTN*	
41455	Biogel PI Indicator System 5.5	25X2 / 100X2	
41460	Biogel PI Indicator System 6.0	25X2 / 100X2	
41465	Biogel PI Indicator System 6.5	25X2 / 100X2	
41470	Biogel PI Indicator System 7.0	25X2 / 100X2	
41475	Biogel PI Indicator System 7.5	25X2 / 100X2	
41480	Biogel PI Indicator System 8.0	25X2 / 100X2	
41485	Biogel PI Indicator System 8.5	25X2 / 100X2	

Recommended for use in all general surgeries or surgeries where latex allergies are a concern for patients or clinicians. Double-packed, the sterile Biogel® PI Indicator System consists of a blue, synthetic, underglove combined with a skin coloured Biogel® PI Ultratouch® overglove that, when worn together, create a coloured puncture indicator system.

Biogel® PI Pro-Fit		479XX	
Ref. No.	Description	RET/CRTN*	
47960	Biogel PI Pro-Fit 6.0	50/200	
47965	Biogel PI Pro-Fit 6.5	50/200	
47970	Biogel PI Pro-Fit 7.0	50/200	
47975	Biogel PI Pro-Fit 7.5	50/200	
47980	Biogel PI Pro-Fit 8.0	50/200	
47985	Biogel PI Pro-Fit 8.5	50/200	
47990	Biogel PI Pro-Fit 9.0	40/160	

Recommended for all surgical procedures or surgeries where latex allergies are a concern for the patients or clinicians. It can be used alone or as an overglove with the Biogel® PI Micro Indicator underglove.

Biogel® Skinsense®			509XX
Ref. No.	Description	RET/CRTN*	
50955	Biogel Skinsense 5.5	50 / 200	
50960	Biogel Skinsense 6.0	50 / 200	
50965	Biogel Skinsense 6.5	50 / 200	
50970	Biogel Skinsense 7.0	50 / 200	
50975	Biogel Skinsense 7.5	50 / 200	
50980	Biogel Skinsense 8.0	50 / 200	
50985	Biogel Skinsense 8.5	50 / 200	
50990	Biogel Skinsense 9.0	40 / 160	

Recommended for use in all surgeries or surgeries where latex allergies are a concern for patients or clinicians. Sterile, powder-free, synthetic polychloroprene gloves that reduce the possibility of glove-related latex protein sensitisation because they are made from a synthetic elastomer. Appropriate for use in the presence of cytotoxic agents\*\*, unless otherwise specified by the chemical manufacturer's guidelines.

\*RET/CRTN - Pair per Retailer/Carton

\*\* Breakthrough testing data available upon request. REPR 0618.

Biogel® Skinsense® Indicator® Underglove			406XX
Ref. No.	Description	RET/CRTN*	
40655	Biogel Skinsense Indicator Underglove 5.5	50 / 200	
40660	Biogel Skinsense Indicator Underglove 6.0	50 / 200	
40665	Biogel Skinsense Indicator Underglove 6.5	50 / 200	
40670	Biogel Skinsense Indicator Underglove 7.0	50 / 200	
40675	Biogel Skinsense Indicator Underglove 7.5	50 / 200	
40680	Biogel Skinsense Indicator Underglove 8.0	50 / 200	
40685	Biogel Skinsense Indicator Underglove 8.5	50 / 200	
40690	Biogel Skinsense Indicator Underglove 9.0	40 / 160	

Recommended for use in all general surgeries or surgeries where latex allergies are a concern for patients or clinicians. Synthetic polychloroprene gloves that reduce the possibility of glove-related latex protein sensitisation because they are made from a synthetic elastomer. The blue underglove can be worn as part of the Biogel Puncture Indication System. Appropriate for use in the presence of cytotoxic agents\*\*, unless otherwise specified by the chemical manufacturer's guidelines.

## BIOGEL / LATEX GLOVES

Biogel Eclipse®			751XX
Ref. No.	Description	RET/CRTN*	
75155	Biogel Eclipse 5.5	50 / 200	
75160	Biogel Eclipse 6.0	50 / 200	
75165	Biogel Eclipse 6.5	50 / 200	
75170	Biogel Eclipse 7.0	50 / 200	
75175	Biogel Eclipse 7.5	50 / 200	
75180	Biogel Eclipse 8.0	50 / 200	
75185	Biogel Eclipse 8.5	50 / 200	
75190	Biogel Eclipse 9.0	40 / 160	

Recommended for all surgeries depending on personal preference. A powder-free natural rubber latex glove that is a softer, more supple gloving solution than a standard natural rubber latex glove. Typically 30% softer than Biogel® Surgeons, therefore more conforming to the individual's hands. Biogel Eclipse® is a latex glove that can raise the level of gloving comfort with improved fit and feel.

Biogel Eclipse® Indicator® Underglove			732XX
Ref. No.	Description	RET/CRTN*	
73255	Biogel Eclipse Indicator Underglove 5.5	50 / 200	
73260	Biogel Eclipse Indicator Underglove 6.0	50 / 200	
73265	Biogel Eclipse Indicator Underglove 6.5	50 / 200	
73270	Biogel Eclipse Indicator Underglove 7.0	50 / 200	
73275	Biogel Eclipse Indicator Underglove 7.5	50 / 200	
73280	Biogel Eclipse Indicator Underglove 8.0	50 / 200	
73285	Biogel Eclipse Indicator Underglove 8.5	50 / 200	
73290	Biogel Eclipse Indicator Underglove 9.0	40 / 160	

Recommended as an underglove and for all types of surgical procedures. A powder-free natural rubber latex glove that is green in colour and softer than standard natural rubber latex. Conforming to the individual's hands, it can be worn as part of the Biogel Puncture Indicator System.

Biogel Eclipse® Indicator® System			607XX
Ref. No.	Description	RET/CRTN*	
60755	Biogel Eclipse Indicator System 5.5	25x2 / 100x2	
60760	Biogel Eclipse Indicator System 6.0	25x2 / 100x2	
60765	Biogel Eclipse Indicator System 6.5	25x2 / 100x2	
60770	Biogel Eclipse Indicator System 7.0	25x2 / 100x2	
60775	Biogel Eclipse Indicator System 7.5	25x2 / 100x2	
60780	Biogel Eclipse Indicator System 8.0	25x2 / 100x2	
60785	Biogel Eclipse Indicator System 8.5	25x2 / 100x2	

A powder-free natural rubber latex glove that is a softer, more supple gloving solution than standard natural rubber latex. Typically 30% softer than Biogel® Surgeons, therefore more conforming to the individual's hands.

Biogel® Surgeons			822XX
Ref. No.	Description	RET/CRTN*	
82255	Biogel Surgeons 5.5	50 / 200	
82260	Biogel Surgeons 6.0	50 / 200	
82265	Biogel Surgeons 6.5	50 / 200	
82270	Biogel Surgeons 7.0	50 / 200	
82275	Biogel Surgeons 7.5	50 / 200	
82280	Biogel Surgeons 8.0	50 / 200	
82285	Biogel Surgeons 8.5	50 / 200	
82290	Biogel Surgeons 9.0	40 / 160	

Sterile, powder-free natural rubber latex gloves for excellent barrier protection in general surgical procedures.
