# We are Mölnlycke, a world-leading medical solutions company

We're here to advance performance in healthcare across the world, and we aspire to equip everybody in healthcare with solutions to achieve the best outcomes.

We collaborate with customers to understand their needs. We design and supply medical solutions to enhance performance at every point of care – from the operating theatre to the home.

## **Improving performance at every point of care**

This is what motivates us every day. We focus on the details that make our solutions more effective. All so that healthcare professionals can perform at their best, and achieve the best clinical and health-economic outcomes.

We do it by....

### **Listening**

We collaborate with healthcare professionals and patients to understand their needs. Then we design solutions that meet them.

### **Generating evidence**

Using a scientific approach, we generate clinical and health-economics evidence proving that our solutions are cost effective, and that they support better outcomes.

### **Continuously improving**

We're always on the lookout for new ways to improve. We focus on the details that make our solutions more effective, improve outcomes and offer better value for money.

### **Educating**

We're always learning. And we share our knowledge through in-person training, videos, demonstrations and online and offline seminars.

We collaborate with specialists to shape healthcare policies and protocols.

### **Building relationships**

We develop long-term trusted relationships and partnerships with healthcare professionals, healthcare organisations and industry bodies.

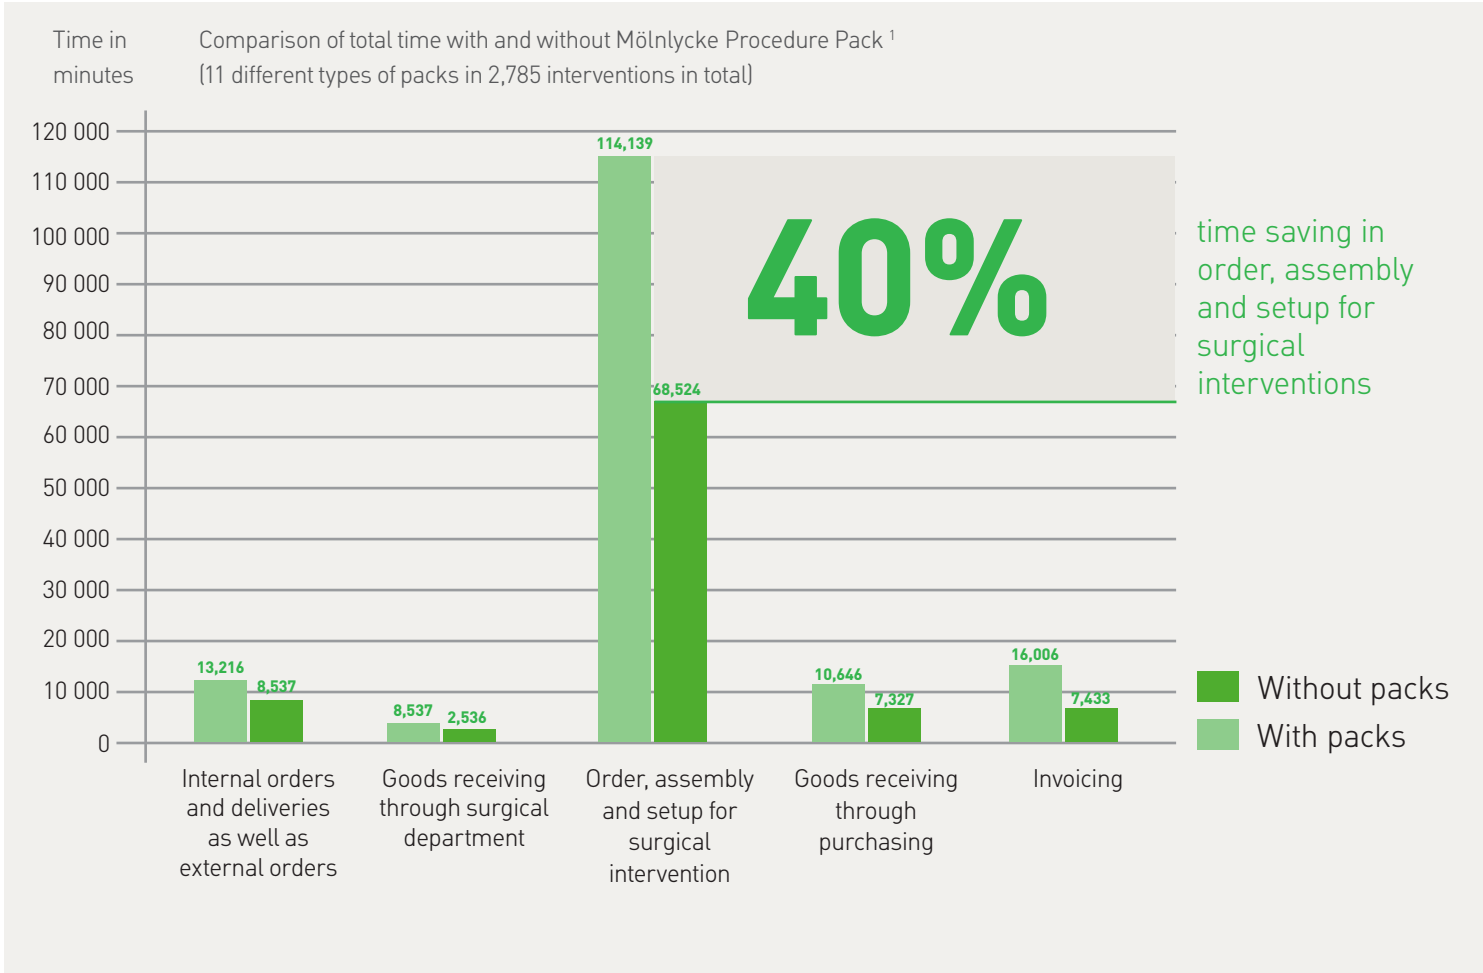

We understand how important trust is, and we do everything we can to build and maintain it.

# Mölnlycke Procedure Packs

Your partner for quality, efficiency and safety. Saving your time in the operating theatre.

Imagine the time and costs that can be saved by including all surgical instruments and components – along with procedure-specific surgical drapes and staff gowns – in one convenient package, ready for quick operating theatre set-up. We value working together, so we have in-house laparoscopic and orthopaedic specialists on call to help you evaluate your needs and choose the right combination of pack components.

## Time saving with Mölnlycke Procedure Pack vs single-packed items

Mölnlycke customised procedure packs are assembled to contain all the single-use components required for a particular surgical intervention. Replacing a large number of individually packaged items. Mölnlycke Procedure Packs can generate significant savings in time and costs for both major and minor surgery procedures. Preparation time for surgical procedures can be cut by more than half compared to traditional preparation of the operation theatre \*

\* Greiling M, 2009 A multinational case study to evaluate and quantify time-saving by using custom procedure packs for operating theatre efficiency.

## Mölnlycke surgical instruments

Mölnlycke is a world-leading surgical partner, designing, developing and manufacturing single-use surgical instruments that meet the diverse needs of healthcare professionals.

Our laparoscopic and orthopaedic specialists work closely with you to define and evaluate your best solution from our diverse surgical instrument range. The result? Your own truly customised laparoscopic solution in either single, sterile packaging, or incorporated into a truly customised procedure specific pack.

Your team strives for efficiency and patient outcomes. We understand why and have made your goals our focus. You can select an effective combination of Mölnlycke pulsed lavage, trocars, monopolar scissors, instruments, L-hook electrodes and detachable endoretrieval pouches, and we

pack all your needs into procedure packs that save time and costs.

Our specialists can help you identify the solution that is exactly right for you and your team, helping you focus on the areas that you are most looking to improve. We can also work with you and your team to help drive the change process and give you even more value from your solution. When we have found your truly customised solution, we can quantify the economic value, based on scientific studies and provide you with a full report.

Pulsed Lavage	Ref. No.	Description	Retailer QTY	Carton QTY

	899104	Detachable EndoRetrieval Pouch 19 x 23cm (1150ml) 15mm	5	50

## BARRIER surgical drapes

All products and solutions within the BARRIER range of surgical drapes are developed and designed to facilitate the everyday work of the operating theatre.

Through the comprehensive range of procedure specific products, BARRIER can provide you with innovative product solutions designed to offer the optimal combination of protection and functionality. All BARRIER drapes are 100% impermeable and designed to ensure the best possible patient safety by providing an optimal barrier against microbial migration. Effective infection control is achieved through impermeable materials, while effective fluid control is obtained through absorption or fluid collection pouches – allowing for a drier working area. Our attention to detail also ensures that all foldings are designed for optimal aseptic handling and easy application.

The BARRIER products also come complete with the best available service and support including both training for optimal usage and supply and logistic solutions all according to the customers' need.

BARRIER is well known in Australia and New Zealand and is Europe's leading brand in single-use surgical drapes. We are setting the standard with a range that fulfills the different needs in the operating theatre. For Mölnlycke and the BARRIER range, our strong commitment is to the medical profession and to patients undergoing treatment.

## BARRIER staff clothing

Surgical gowns not only help prevent infection of the surgical wound, they also protect the operating team from liquid contamination.

BARRIER surgical gowns offer different levels of protection, covering the needs of less invasive operations with fluid repellent material to wet surgery with breathable plastic reinforced front, impermeable sleeves and seams. The toughest conditions can be met with a surgical gown that is impermeable all over.

BARRIER surgical gowns have very high comfort levels thanks to breathable and soft material.

Wearing apparel is developed to ensure both patient safety and comfort for healthcare professionals. The range of single-use scrub

suits and warm-up jackets provides the comfort and quality of wearing fresh clothes every day. Single-use scrub suits contribute to hospital infection control.<sup>2</sup>

BARRIER headwear provides high comfort and reduces the risk of particles falling into the wound.<sup>3</sup>

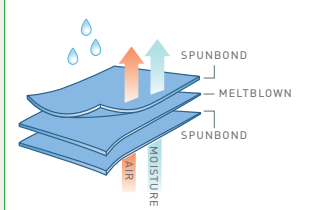

Medical masks are made from highest quality materials. They offer bacterial filtration and splash resistance.<sup>4</sup>

The varying demands of surgery create a need for different combinations of protection and comfort.

BARRIER surgical gown material platform provide:

- different levels of protection – from a basic level to an advanced level for high risk procedures
- comply with EN13795<sup>5</sup> & AAMI<sup>6</sup> standards
- Primary, Universal and Ultimate are available in Standard Performance (SP) and High Performance (HP). Fluid Protection Plus (FPP) is available in High Performance (HP)
- high comfort levels – from lightweight to extremely soft and highly breathable material

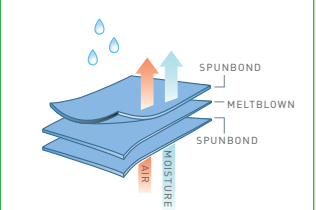

PRIMARY

SMS

- Fluid repellent for adequate protection
- Nonwoven polypropylene fibres
- Spunbond for strength, meltblown for repellency
- Lightweight for added comfort
- EN13795 Standard/High Performance

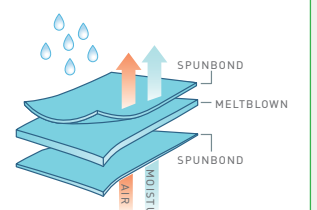

UNIVERSAL

SMS

- Treated to provide increased repellency to low surface tension fluids
- Impermeable polyethylene film reinforced critical zones to minimise risk of strike-through
- Ultrasonic welded sleeves for increased repellency
- EN13795 Standard/High Performance
- AAMI Level 3

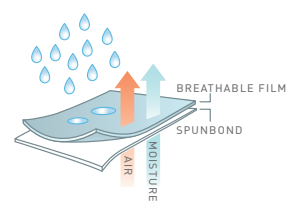

ULTIMATE

Soft SMS

- Highly fluid repellent material for advanced protection
- Nonwoven polypropylene fibres
- Spunbond for strength, increased meltblown for higher repellency
- Treated to provide increased repellency to low surface tension fluids, such as blood
- Extremely soft and breathable for ultimate comfort
- EN13795 Standard/High Performance
- AAMI Level 3

FPP\*

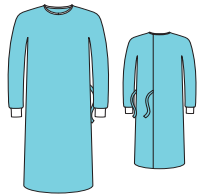

2 ply laminate

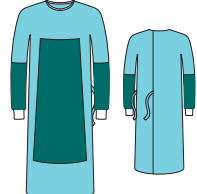

- Our highest protective material, impermeable to body fluids all over
- Microporous polyethylene film and polyester/polyethylene nonwoven comfort layer
- The micropores allow air and moisture to move from the body to the outside of the gown and the film protects against blood and fluid penetration, the comfort layer against the skin increase the comfort of the gown.
- Ultralight, breathable material for thermal comfort
- EN13795 High Performance
- AAMI Level 3

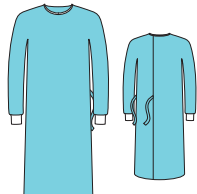

\* FPP = Fluid Protection Plus

## Patient warming

In the operating theatre, the effects of anaesthesia, coupled with a reduction in metabolic heat production, means patients are more at risk of hypothermia, which is defined as a core body temperature below 36°C. This can result in a wide range of consequences, from serious health risks through to increased costs. Hypothermia can occur before, during and after surgery.

The BARRIER EasyWarm active self-warming blanket helps to prevent hypothermia in the peri-operative setting. Once opened and unfolded, the blanket

reaches operational temperature within 30 minutes and maintains a max temp of 42°C and can last up to 12 hours.

The benefits of BARRIER EasyWarm are:

- Helps to prevent hypothermia in the peri-operative setting
- Easy and quick set up to save time
- Easy to use before, during and after surgery for efficient patient warming
- Easily available to more patients thanks to no need for additional equipment

BARRIER

## Biogel gloves

Biogel is the world's leading brand for high quality, technically advanced surgical gloves for healthcare professionals.

It is the brand behind one of the most significant breakthroughs in surgical glove history — the unique Biogel inner polymer coating was the first to allow easy damp donning.

Biogel is still setting the standards in protection, with a range of latex and synthetic surgical gloves that vary in sensitivity and texture, enabling you to choose from a wide range of options that suit your personal comfort and protection needs. Biogel gloves have industry leading Acceptable Quality Level (AQL) for freedom from holes on the market, a security feature that helps minimise the risk to both patient and

healthcare workers from blood-borne pathogens, including HIV and hepatitis viruses.

Biogel is the only major surgical glove brand with a 100% non-pyrogenic range, reducing the chance of irritation, fever and inflammation, which in turn can reduce the need for costly postoperative interventions.

Biogel is also the only major surgical glove brand with an exclusively powder-free range. Manufactured and packed in a powder-free facility, these gloves can be used in any common surgical procedure with no risk of powder contamination.

# Biogel gloves set the standard in protection

## Unique Biogel coating

Biogel gloves' unique and exclusive coating provides superior donning ability, even with damp hands. The coating has hydrophilic properties that conform to hands like a "second skin". The Biogel coating even soothes hands to help prevent moisture loss.<sup>7</sup>

## Biogel quality

Every Biogel glove is air inflation tested and visually inspected for quality and user confidence. Biogel has an industry leading AQL freedom from holes of 0.65, which is well above the standard requirement of 1.5.

## Biogel latex powder-free surgical gloves

Because powdered gloves release more airborne latex proteins than any other medical product, all Biogel gloves are powder-free to help minimise the risk of latex sensitivity. Powder has also been known to potentially cause post-operative complications in patients and skin dermatitis in healthcare workers. We are the only major surgical glove manufacturer to offer an exclusively powder-free, low-protein glove line with low residual chemicals.<sup>8,9</sup>

While natural rubber latex is the gold standard in providing unsurpassed barrier protection, concerns about latex allergies in healthcare workers and patients have moved many facilities over to synthetic glove options.

Synthetic surgical gloves can be more expensive than natural rubber latex, but it is important to understand and consider the additional costs of managing latex allergies in the equation.

Today's synthetic surgical gloving options offer barrier protection properties and fit, feel and comfort similar or comparable to natural rubber latex. The Biogel range of synthetic surgical gloves is available in polychloroprene materials, as well as polyisoprene, which shares a molecular structure similar to natural rubber latex.

## Biogel Indicator Systems

Glove perforations can have serious consequences in today's healthcare environment. In fact, medical professionals carry a higher burden of significant occupational exposures to blood-borne viruses (41%). This percentage increased by 78% from 2002 to 2005.<sup>10</sup> The American College of Surgeons states: "Double-gloving does help to cut down, by a factor of 10, the number of potential exposures.<sup>11</sup> With 92% of all punctures going unnoticed by surgeons, the Biogel double-gloving Puncture Indication System has a 97% accuracy rate in identifying punctures.<sup>12</sup>

The Biogel product line offers several different Puncture Indication Systems, featuring patent pending colour indication technology, that will alert the practitioner to punctures if they should occur when fluid is present. This makes Biogel the superior double-glove solution and an effective risk reduction strategy.

The Biogel double-gloving Puncture Indication System is available in both latex and synthetic.

## How Biogel Indicator Systems work

- Two gloves are worn: a Biogel Indicator underglove (coloured) and a Biogel overglove (opaque).
- If the overglove is punctured and fluid penetrates between the two gloves, a dark patch alerts the wearer to the puncture.

Don't let glove perforations go undetected. Let the Biogel double-gloving Puncture Indication System alert you with visible evidence of a perforation, in the presence of fluid, as it happens.

Biogel® PI Micro		485XX	
	Ref. No.	Description	RET/CRTN*
	48555	Biogel PI Micro 5.5	50 / 200
	48560	Biogel PI Micro 6.0	50 / 200
	48565	Biogel PI Micro 6.5	50 / 200
	48570	Biogel PI Micro 7.0	50 / 200
	48575	Biogel PI Micro 7.5	50 / 200
	48580	Biogel PI Micro 8.0	50 / 200
	48585	Biogel PI Micro 8.5	50 / 200
	48590	Biogel PI Micro 9.0	40 / 160

Recommended for all surgical procedures and when extra tactile sensitivity is needed or when latex allergies are a concern for patients or clinicians. Biogel PI Micro is a synthetic, powder-free, polyisoprene, surgical glove that has the fit, feel and comfort of natural rubber latex. It's typically 20% thinner than Biogel PI UltraTouch and it is designed for improved tactile sensitivity.

Biogel® PI Micro Indicator System		483XX	
	Ref. No.	Description	RET/CRTN*
	48355	Biogel PI Micro Indicator System 5.5	25x2/100x2
	48360	Biogel PI Micro Indicator System 6.0	25x2/100x2
	48365	Biogel PI Micro Indicator System 6.5	25x2/100x2
	48370	Biogel PI Micro Indicator System 7.0	25x2/100x2
	48375	Biogel PI Micro Indicator System 7.5	25x2/100x2
	48380	Biogel PI Micro Indicator System 8.0	25x2/100x2
	48385	Biogel PI Micro Indicator System 8.5	25x2/100x2

Recommended for all surgical procedures and when extra tactile sensitivity is needed or when latex allergies are a concern for patients or clinicians. Double-packed, the sterile Biogel PI Micro Indicator System consists of a blue, synthetic underglove combined with a skin coloured Biogel PI Micro overglove that, when worn together, create a coloured puncture indication system.

Biogel® PI Indicator® Underglove		416XX	
	Ref. No.	Description	RET/CRTN*
	41655	Biogel PI Indicator Underglove 5.5	50 / 200
	41660	Biogel PI Indicator Underglove 6.0	50 / 200
	41665	Biogel PI Indicator Underglove 6.5	50 / 200
	41670	Biogel PI Indicator Underglove 7.0	50 / 200
	41675	Biogel PI Indicator Underglove 7.5	50 / 200
	41680	Biogel PI Indicator Underglove 8.0	50 / 200
	41685	Biogel PI Indicator Underglove 8.5	50 / 200
	41690	Biogel PI Indicator Underglove 9.0	40 / 160

Recommended for use in all general surgeries or surgeries where latex allergies are a concern for patients or clinicians. The gloves provide levels of fit, feel and comfort comparable to natural rubber latex because synthetic polyisoprene shares comparable molecular structure. The underglove is blue in colour and can be worn alone or as part of the Biogel Puncture Indication System. The smooth surface is specifically engineered for unparalleled ease of double-donning.

Biogel® Skinsense®		509XX	
	Ref. No.	Description	RET/CRTN*
	50955	Biogel Skinsense 5.5	50 / 200
	50960	Biogel Skinsense 6.0	50 / 200
	50965	Biogel Skinsense 6.5	50 / 200
	50970	Biogel Skinsense 7.0	50 / 200
	50975	Biogel Skinsense 7.5	50 / 200
	50980	Biogel Skinsense 8.0	50 / 200
	50985	Biogel Skinsense 8.5	50 / 200
	50990	Biogel Skinsense 9.0	40 / 160

Recommended for use in all surgeries or surgeries where latex allergies are a concern for patients or clinicians. Sterile, powder-free, synthetic polychloroprene gloves that reduce the possibility of glove-related latex protein sensitisation because they are made from a synthetic elastomer. Appropriate for use in the presence of cytotoxic agents\*\*, unless otherwise specified by the chemical manufacturer's guidelines.

Biogel® PI Micro Indicator Underglove		489XX	
	Ref. No.	Description	RET/CRTN*
	48955	Biogel PI Micro Indicator Underglove 5.5	50 / 200
	48960	Biogel PI Micro Indicator Underglove 6.0	50 / 200
	48965	Biogel PI Micro Indicator Underglove 6.5	50 / 200
	48970	Biogel PI Micro Indicator Underglove 7.0	50 / 200
	48975	Biogel PI Micro Indicator Underglove 7.5	50 / 200
	48980	Biogel PI Micro Indicator Underglove 8.0	50 / 200
	48985	Biogel PI Micro Indicator Underglove 8.5	50 / 200
	48990	Biogel PI Micro Indicator Underglove 9.0	40 / 160

Recommended to be used as an underglove for all surgical procedures or surgeries where latex allergies are a concern for patients or clinicians. The blue glove can be used alone or as part of the Biogel Puncture Indication System together with any Biogel PI overglove particularly when improved tactile sensitivity is needed. The Biogel PI Micro Indicator System provides clear, fast and large coloured puncture indication<sup>13</sup>. Typically 20% thinner than Biogel PI Indicator Underglove the Biogel PI Micro Indicator Underglove is designed for improved tactile sensitivity.

Biogel® PI UltraTouch®		409XX	
	Ref. No.	Description	RET/CRTN*
	40955	Biogel PI UltraTouch 5.5	50 / 200
	40960	Biogel PI UltraTouch 6.0	50 / 200
	40965	Biogel PI UltraTouch 6.5	50 / 200
	40970	Biogel PI UltraTouch 7.0	50 / 200
	40975	Biogel PI UltraTouch 7.5	50 / 200
	40980	Biogel PI UltraTouch 8.0	50 / 200
	40985	Biogel PI UltraTouch 8.5	50 / 200
	40990	Biogel PI UltraTouch 9.0	40 / 160

Recommended for use in all general surgeries or surgeries where latex allergies are a concern for patients or clinicians. Sterile, powder-free, synthetic polyisoprene gloves that reduce the possibility of glove-related latex protein sensitisation because they are made from a synthetic elastomer. The gloves provide levels of fit, feel and comfort comparable to natural rubber latex because synthetic polyisoprene shares a similar molecular structure.

Biogel® PI Indicator System		414XX	
	Ref. No.	Description	RET/CRTN*
	41455	Biogel PI Indicator System 5.5	25X2 / 100X2
	41460	Biogel PI Indicator System 6.0	25X2 / 100X2
	41465	Biogel PI Indicator System 6.5	25X2 / 100X2
	41470	Biogel PI Indicator System 7.0	25X2 / 100X2
	41475	Biogel PI Indicator System 7.5	25X2 / 100X2
	41480	Biogel PI Indicator System 8.0	25X2 / 100X2
	41485	Biogel PI Indicator System 8.5	25X2 / 100X2

Recommended for use in all general surgeries or surgeries where latex allergies are a concern for patients or clinicians. Double-packed, the sterile Biogel PI Indicator System consists of a blue, synthetic, underglove combined with a skincoloured PI Ultratouch overglove that, when worn together, create a coloured puncture indictor system.

Biogel® Skinsense® Indicator® Underglove		406XX	
	Ref. No.	Description	RET/CRTN*
	40655	Biogel Skinsense Indicator Underglove 5.5	50 / 200
	40660	Biogel Skinsense Indicator Underglove 6.0	50 / 200
	40665	Biogel Skinsense Indicator Underglove 6.5	50 / 200

	40675	Biogel Skinsense Indicator Underglove 7.5	50 / 200
	40680	Biogel Skinsense Indicator Underglove 8.0	50 / 200
	40685	Biogel Skinsense Indicator Underglove 8.5	50 / 200
	40690	Biogel Skinsense Indicator Underglove 9.0	40 / 160

Recommended for use in all general surgeries or surgeries where latex allergies are a concern for patients or clinicians. Synthetic polychloroprene gloves that reduce the possibility of glove-related latex protein sensitisation because they are made from a synthetic elastomer. The blue underglove can be worn alone or as part of the Biogel Puncture Indication System. Appropriate for use in the presence of cytotoxic agents\*\*, unless otherwise specified by the chemical manufacturer's guidelines.

Biogel Eclipse®			751XX
	Ref. No.	Description	RET/CRTN*
	75155	Biogel Eclipse 5.5	50 / 200
	75160	Biogel Eclipse 6.0	50 / 200
	75165	Biogel Eclipse 6.5	50 / 200
	75170	Biogel Eclipse 7.0	50 / 200
	75175	Biogel Eclipse 7.5	50 / 200
	75180	Biogel Eclipse 8.0	50 / 200
	75185	Biogel Eclipse 8.5	50 / 200
	75190	Biogel Eclipse 9.0	40 / 160

Recommended for all surgeries depending on personal preference. A powder-free natural rubber latex glove that is a softer, more supple gloving solution than a standard natural rubber latex glove. Typically 30% softer than Biogel Surgeons, therefore more conforming to the individual's hands. Biogel Eclipse is a latex glove that can raise the level of gloving comfort with improved fit and feel.

Biogel Eclipse® Indicator® Underglove			732XX
	Ref. No.	Description	RET/CRTN*
	73255	Biogel Eclipse Indicator Underglove 5.5	50 / 200
	73260	Biogel Eclipse Indicator Underglove 6.0	50 / 200
	73265	Biogel Eclipse Indicator Underglove 6.5	50 / 200
	73270	Biogel Eclipse Indicator Underglove 7.0	50 / 200
	73275	Biogel Eclipse Indicator Underglove 7.5	50 / 200
	73280	Biogel Eclipse Indicator Underglove 8.0	50 / 200
	73285	Biogel Eclipse Indicator Underglove 8.5	50 / 200
	73290	Biogel Eclipse Indicator Underglove 9.0	40 / 160

Recommended as an underglove and for all types of surgical procedures. A powder-free natural rubber latex glove that is green in colour and softer than standard natural rubber latex. Conforming to the individual's hands and it can be worn alone or as part of the Biogel Puncture Indicator System

Biogel Eclipse® Indicator® System			607XX
	Ref. No.	Description	RET/CRTN*
	60755	Biogel Eclipse Indicator System 5.5	25x2 / 100x2
	60760	Biogel Eclipse Indicator System 6.0	25x2 / 100x2
	60765	Biogel Eclipse Indicator System 6.5	25x2 / 100x2
