# Epaderm<sup>®</sup> cream

Epaderm is indicated for the management of the effects of dry skin conditions such as mild eczema or mild psoriasis.

It is suitable for all ages, including babies<sup>1</sup>, and with no fragrances or colours, it is kind to already sensitive skin.

Epaderm 2-in-1 cream – is a lighter formula that is absorbed quickly and easily into the skin and can be used as an emollient or a skin cleanser.

**Note:** Please consult your healthcare professional for additional instructions if tubular bandages such as Tubifast<sup>®</sup> or dressings are being used in conjunction with this product.

Special notes:

---

---

---

---

Body & facial cleanser? **Yes**

Skin Emollient? **Yes**

## How to use Epaderm® Cream?

- Ensure hands are clean before applying Epaderm Cream.
- As a skin emollient: apply to skin as often as required.
- As a skin cleanser: dispense a small amount onto your hand, lather under warm water and then use as a normal soap.

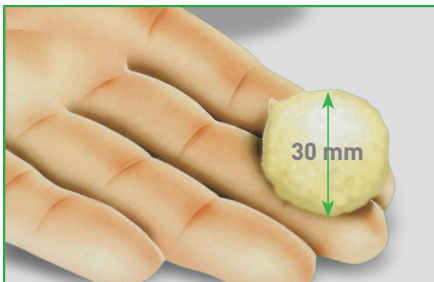

Note: If symptoms persist, please consult your healthcare professional.

## How much to apply?

### Minimum amounts required for an adult

Face, ears and neck .....	1 measure twice a day
Arms and back .....	2 measures twice a day
Both legs .....	4 measures twice a day
Both hands .....	½ measure twice a day
Genitals .....	½ measure twice a day

Children under ten years of age require half the above amounts.

1 measure = 4 grams of Epaderm Cream
